What's New In?

AlphaGirl0001 is a sweet ScreenMate for Windows that look like the E.T. of the kid species. AlphaGirl0001, green liquid with the eyes, is constantly moving around the desktop. E.T.s enjoy snacking on Hydrogen atoms! The Hydrogen atoms are multiplied to Hydronium ions that grow to Hydrogen oxides that form Hydrogen Peroxide that turns into a series of Hydrogen atoms forming Hydrogen gas. Double-click the filenames for other ScreenMates. Enjoy! Disclaimer : I dont own any of these screenmates. eFusion is an easy to use, new way to create custom screensavers for your PC. You can use eFusion to create your own special screensaver or to customize existing screensavers. Features Select from an array of thousands of predefined screensavers. Select your own image from your hard disk as the background. Select your own background music. Select your own background sounds or a combination of background music and sounds. Select your own text or image to make up a description of your screensaver. Select your own graphic to use in place of the background. Select

your own animation to play each time the screensaver is run. Select your own transition effect between screensavers and images. Select your own time delay before each transition is played. Select your own time before each screen saver is run. Select multiple screensavers for a "partitioned" screensaver. Each screen saver has its own configurable settings. Create a complete screensaver that runs for a set length of time and then goes to sleep for a set length of time. eFusion is an easy to use, new way to create custom screensavers for your PC.
